

# 142d DECT handset

Supplementary information  
Telephony & cordless

**Designed and optimised as a lightweight handset, the 142d cordless handset allows you to be contacted anywhere, anytime, while mobile around your workplace. Managing on the move becomes a reality as you control your time and become more efficient. No more missed calls, post it notes or call backs to frustrated callers.**

The 142d DECT handset includes features such as hand-free mode, a headset option, vibration fitted as standard, a backlit illuminated display and illuminated keypad, five-line graphics display with adjustable contrast, as well as the ability to administer the local telephone book.

The 142d DECT handset comes equipped with the mute function and is also able to offer the user all of the system functionality of the Access-IP, if the applications have been licensed. Missed calls, voicemail and messages are all indicated by a flashing 'i' LED on the handset. Simply step through the interactive menu to listen to voicemail and return missed calls or messages. The 142d DECT handset can also store up to 100 personal telephone numbers.

## Accessories

- The handset is sold as a bundle including charger, batteries, SIM card and swivel belt clip
- A range of leather holsters with fixed or swivel belt clips are available and will help to protect your handset against damage

## 142d DECT handset features

- 13 language options: English, German, French, Italian, Spanish, Dutch, Swedish, Portuguese, Czech, Danish, Slovenian, Swedish and Finnish
- 30 individual ringtones are available allowing the user to personalise their handset, as well as allocating different ringtones to internal, external, VIP and personal calls
- The 'telbook' key provides easy access to any internal or external telephone numbers pre-programmed in the Access-IP. Ten personal quick-call numbers may be programmed under keys 1 to 9

Base station

Access-IP 510

Access-IP 150

## SOS number

A number can be programmed to the SOS key. Press and hold the key to call the special number for help or assistance.

## MEM (SIM) card

The MEM card is like a GSM SIM card and carries all of your user details. If you need to change your phone, simply move the MEM card to the replacement handset.
