

Access-IP auxiliary phones

Supplementary information

Telephony & cordless

Auxiliary unit and accessories for the OP7x range of desk phones.

Access-IP system desk telephones may be expanded using an auxiliary unit. The auxiliary units increase the number of programmable keys available, making it easier to answer calls and improving efficiency.

Extension units may be added to both standard and IP desk telephones.

OP7x key extensions available in black and white

- 36 freely programmable keys with label strips and status LED
- Unit angling in four steps from 21° to 30°
- Usable with OP73 and OP75
- Power supply required with each auxiliary unit
- Up to three auxiliary units may be linked (up to 108 keys)

OP75 key extensions available in black and white

- 20 freely programmable keys next to the display with three layers of LEDs - 60 keys
- The current layer is signalled via LED (no automatic jump back)
- Illuminated graphic display
- Unit angling in four steps from 21° to 30°
- Usable with Multitone OP75
- Power supply required with each auxiliary unit
- Up to three auxiliary units connectable (up to 180 keys)

Headset benefits

- Increase typing speeds and productivity by up to 43%
- Cut call placement time by up to 44%
- Improve call response times and customer service by up to 72%
- Reduce hang up time by 59%
- Reduce data input errors affecting business
- Reduce body stress and tension at work
