

Access-IP desk phones

Supplementary information

Telephony & cordless

Access-IP has a range of smart, easy-to-use digital and IP desk phones. A simple key layout with activity LEDs makes these telephones easy and intuitive to use. The handsets are available in ivory and charcoal grey.

Entry level

The OP71 desk phone is a low cost wired system phone with dual line graphic display, five programmable keys and a range of features for straightforward communications with customers and personnel.

Mid range

The OP73 desk phone is a wired system or IP telephone with a four line graphic display and two associated programmable keys, which will display the programmed features. There are five additional programmable keys for easy access to the features you use the most.

Top of the range

The OP75 desk phone wired system or IP telephone with an illuminated graphic display, eight programmable keys and one fixed line key. This system telephone will greatly improve your communication lifestyle.

To extend the number of feature keys the OP73 and OP75 desk phones can be supplied with up to three of the optional key extender or display units.

This range of handsets offers hot desking, allowing mobile personnel to come into the office and log in to any telephone, which will then display the personal features for that user. When work is finished the user will log out ready for another mobile worker, making the best use of office space.

IPC telephone for PCs and laptops

Do you need to work away from the office but remain in contact with colleagues and customers? The IPC phone on your PC or laptop gives you access to your Access-IP telephone system from anywhere in the world! If you have a broadband or internet connection to your company's network, then the IPC phone will keep you in contact.

Key expansion auxiliary units

The OP73 and OP75 handsets can be expanded by adding up to three extension units to the telephone. There are two types of key extension units:

- key extension unit with LCD display - may only be used with OP75 handsets. This unit has 20 keys with three levels for 60 additional keys. Up to three units may be added
- key extension unit with paper labels - may be used with either OP73 or OP75. Each unit has 36 additional keys and up to three units may be added
