

CH78 DECT handset

Supplementary information
Telephony & cordless

The CH78 DECT handset has a streamlined design and combines quality with practicality, allowing you to communicate and remain mobile at work.

Being able to manage on the move is essential in today's competitive business environment. Receiving and making calls while mobile enhances communication with customers and staff, improving efficiency, responsiveness, productivity and day-to-day management. For organisations with more than one site, the CH78 can be registered on up to 15 sites so staff can be truly mobile around all parts of the business.

The CH78 DECT handset is ideal for office environments and has all the features of a standard telephone, allowing users to make and receive telephone calls, send and receive text messages and access voicemail. The handset is practical as well as functional, having a large, clear and easy to read screen that is back-lit for subdued lighting conditions or use at night. As well as various control options the handset is fitted with a vibrate feature for use in noisy environments or when users do not want to be disturbed, such as an important meeting.

CH78 features:

- large easy-to-read colour screen
- hands-free option so you can talk while you work
- key lock preventing accidental phone calls
- headset connection
- vibrate function
- telephone book for 250 name entries with 4 numbers per entry
- 10 different ringtones and adjustable volume
- 12 menu languages (English, French, Spanish Italian, German, Dutch, Czech, Polish, Danish, Norwegian, Finnish, Swedish)
- Compatible with Multitone wireless servers KWS300, KWS6000, KWS8000, CS100*, CS600* and CS600-IPL*
- compatible with Multitone alarm and messaging products

CH78BT

The CH78BT DECT handset has the same features as the CH78, however instead of a headset connection, the CH78BT allows users to connect a Bluetooth headset to the handset. Users can connect their Bluetooth headset used with their own mobile phones, or we have a range of headsets suitable for various working environments, including over the ear, over-head or ear defender options.

*The CS100, CS600 and CS600-IPL wireless servers are now obsolete
